Definition: For award of a new contract, purchase order, task\delivery order, or BPA Call valued above the SAT a solicitation issuance date must be provided, regardless of whether the new award: Was required to be advertised (i.e., posted on FBO, etc.); Is an order under a single-award indefinite-delivery contract; or Is an award that was not competed.

Instruction: - Task\Delivery Orders or BPA Calls: Enter the date an RFQ\Solicitation was issued. If no formal RFQ\Solicitation is issued, (i.e., orders under a single award IDIQ) enter the date the requirement was provided to the entity - When the action is the award of a task\delivery order using existing pre-priced line items under an indefinite-delivery contract where no proposal is required (i.e., there are no elements of the delivery or performance to negotiate), for example, a contract for routine parts, use the date of the award as the 'Solicitation Date.' - For awards made in response to unsolicited proposals, the 'Solicitation Date' is the date when the offeror is notified of proposal acceptance for negotiations and/or award. - When the action is the award of a contract under a Broad Agency Announcement (BAA), use the date when a final (not draft) combined synopsis/solicitation is issued as the ' Solicitation Date' except: For two-step BAAs, including white paper submissions for review, selection, and subsequent request for full proposals, the 'Solicitation Date' is the date when the Contracting or Agreements Officer signs the proposal request; Under BAAs with calls, the 'Solicitation Date' is the date when the individual call is issued; For open BAAs, when white papers and/or proposals are accepted for review over an extended period (typically open for a year or longer), the 'Solicitation Date' is either the date when the Contracting or Agreements Officer signs a proposal request (white papers) or the date on which the proposal is submitted, whichever is earlier.

6C Multiyear Contract

Name: Multiyear Contract

DEName: Multiyear_Contract

Screen Name: Multiyear Contract

XML Tag Name: multiYearContract

XML Version: Version 1.0 and later; Changed the data element type from Boolean to String in Version 1.3

Derivation: The base document propagates the value to the orders and to all the modifications

Definition: A multiyear contract means a contract for the purchase of supplies or services for more than 1, but not more than 5, program years. Such contracts are issued under specific congressional authority for specific programs. A multiyear contract may provide that performance under the contract during the second and subsequent years of the contract is contingent upon the appropriation of funds, and (if it does so provide) may provide for a cancellation payment to be made to the entity if

appropriations are not made. The key distinguishing difference between multi-year contracts and multiple year contracts is that multi-year contracts buy more than 1 year of requirement (of a product or service) without establishing and having to exercise an option for each program year after the first.

Instruction: If the contract is a FAR 17.1 Multiyear Contract, then select FAR 17.1 Multiyear Contract. Otherwise, select Not a FAR 17.1 Multiyear Contract.

6D Type of IDC

ElementNo: 6D

Name: Type of IDC

DEName: Type_Of_IDC

Screen Name: Type of IDC

XML Tag Name: typeOfIDC

XML Version: Version 1.0 and later

Derivation: None

Definition: Identifies whether the IDC or Multi-Agency Contract is Indefinite Delivery/Requirements, Indefinite Delivery/Indefinite Quantity, or Indefinite Delivery/Definite Quantity. A requirements contract provides for filling all actual purchase requirements of designated Government activities for supplies or services during a specified contract period, with deliveries or performance to be scheduled by placing orders with the entity. A Requirements IDC or Multi-Agency Contract is a contract for all of the agency's requirement for the supplies or services specified, and effective for the period stated, in the IDC or Multi-Agency Contract. After award, the contract is a mandatory source for the agency for the supplies or services specified. The quantities of supplies or services specified in the IDC or Multi-Agency Contract are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment. An indefinite-quantity contract provides for an indefinite quantity, within stated limits, of supplies or services during a fixed period. The Government places orders for individual requirements. Quantity limits may be stated as number of units or as dollar values. An Indefinite-Quantity is a contract for the supplies or services specified, and effective for the period stated, in the IDC or Multi-Agency Contract. The quantities of supplies and services specified in the IDC or Multi-Agency Contract are estimates only and are not purchased by this contract. A definite-quantity contract provides for delivery of a definite quantity of specific supplies or services for a fixed period, with deliveries or performance to be scheduled at designated locations upon order. A Definite Quantity IDC or Multi-Agency Contract is a definite-quantity, indefinite-delivery contract for the supplies or services specified, and effective for the period stated, in the IDC or Multi-Agency Contract.

Instruction: Enter the code from the list for the initial load of an Indefinite Delivery Contract (IDC) or Multi-Agency Contract, but not for Government-Wide Acquisition Contracts (GWACs). If this data element is completed, then users will be prompted to report the next two data elements.

DEName: Place_Of_Perform_Country_Code

Screen Name: Principal Place of Performance Code (State, Location, Country)

XML Tag Name: locationCode, stateCode, countryCode

XML Version: Version 1.0 and later

Derivation: None

Definition: For Services: The predominant place of performance at the time of award. Predominance is based on funding. If funds are equal, Contracting Officers (COs) should use their best judgement. - In the case of subscription services, software licenses, or similar type services; use the location where these services are being

used. - In the case of services that begin in one location and end in another (e.g., shipping); use the destination. - In the case of services being performed in oceans/seas, choose the closest major city (if in U.S. waters). In another country's waters, choose that country. If in open waters, choose the closest country and choose the closest major city if that country is the U.S. - In the case of services being performed in the atmosphere or space, choose the location from which the equipment conducting the services was launched. - If the place of performance is not specified by the government in the Statement of Work or Performance Work Statement, and the CO does not have any other information indicating a specific location, the CO may use the entity's location as the place of performance. For Goods/Supplies: Items being manufactured should reflect the manufacture site as the place of performance. All other goods should enter the location the item was taken from inventory (e.g., the store location, etc.). - If the place of performance is located in the U.S. in an area that has no ZIP Plus 4 code (e.g., a national park, a remote location, etc.), use the closest location that does have a ZIP Plus 4. NOTE: Not all procurements require documentation of the place of performance in the file.

12. Requirement State for MOD, for all elements except 'Reason For Modification', actually depends upon it's base document type and not just limited to AWARD/IDV. i.e. If the MOD requirement state displayed 'Required', hence the field should be open on screen and It would be required for any one or more document type but not necessarily all.
