Definition: For all Federal financial assistance, agencies are required to establish detailed and accurate award descriptions at the time of award. Assistance descriptions are critical to ensuring accountability and transparency, as they are a primary means to inform the public of the purpose of the Federal funding that is distinct from the programmatic level information in the Assistance Listings.

At a minimum, Assistance descriptions should provide specificity about the award purpose, activities to be performed, deliverables and expected outcomes, and intended beneficiary(ies) or recipient of the funds, as well as subrecipient activities if known or specified at the time of award.

Per OMB policy, the Award Description for a modification should serve two functions:

- 1) Describe what the modification itself is accomplishing, and
- 2) Provide information about the award
